

Welcome!

Thank you for downloading our Cocoon – Developer Template!

Cocoon – InApp

Download the developer app

In order to test our InApp demo we have uploaded a Developer App to Google Play. It's a closed beta, so you have to „Become a tester“ first. For this you find a link in the package or here.

<https://play.google.com/apps/testing/com.cioinapp.shatter>

Then, once you are a beta tester, visit this link

<https://play.google.com/store/apps/details?id=com.cioinapp.shatter>

and download the developer app from the store.

Note!

Make sure that no other developer app is installed on your device. This could lead to a conflict and an installation error!

If you are facing any issue, please don't hesitate to contact me.

https://forums.cocoon.io/users/andy_reitberger/activity

or

<https://shatter-box.com/forums>

Run the zip file

You will find a folder called „01_Developer_App“. There you'll find a zip file and a link to the zip file.

You either can upload the zip file directly to your device or just scan the QR code.
